SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

... figures not available

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

P preliminary figures.

r revised figures.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications du Bureau fédéral de la statistique:

... nombres indisponibles.

... n'ayant pas lieu de figurer.

- néant ou zéro.

-- nombres infimes.

P nombres provisoires.

r nombres rectifiés.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

TABLE 1. Shipments of Prepared Stock and Poultry Feeds

| | Total estimated shipments 1966 | Month | | Cumulative | | |
|--|---|---------|---------|------------|------|--|
| | | 1966 | 1967 | 1966 | 1967 | |
| tons | | | | | | |
| <u>"A" Primary concentrates and premixes</u> | | | | | | |
| Calf | 4,534 | 246 | 282 | | | |
| Dairy cattle | 117,502 | 10,276 | 11,164 | | | |
| Beef cattle | 69,100 | 8,750 | 8,653 | | | |
| Swine | 183,416 | 15,064 | 18,221 | | | |

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

.. figures not available

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

P preliminary figures.

r revised figures.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications du Bureau fédéral de la statistique:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

- néant ou zéro.

-- nombres infimes.

P nombres provisoires.

r nombres rectifiés.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

TABLE 1. Shipments of Prepared Stock and Poultry Feeds

| | Total estimated shipments 1966 | February | | Two months ended February | | |
|--|---|----------|---------|------------------------------|---------|--|

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

.. figures not available

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

P preliminary figures.

r revised figures.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications du Bureau fédéral de la statistique:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

- néant ou zéro.

-- nombres infimes.

P nombres provisoires.

r nombres rectifiés.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

.. figures not available

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

P preliminary figures.

r revised figures.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications du Bureau fédéral de la statistique:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

- néant ou zéro.

-- nombres infimes.

P nombres provisoires.

r nombres rectifiés.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

TABLE 1. Shipments of Prepared Stock and Poultry Feeds

| | Total estimated shipments 1966 | April | | Four months ended April | | |

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

- .. figures not available
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications du Bureau fédéral de la statistique:

- ... nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

.. figures not available

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

P preliminary figures.

r revised figures.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications du Bureau fédéral de la statistique:

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

- néant ou zéro.

-- nombres infimes.

P nombres provisoires.

r nombres rectifiés.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Tables 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- P preliminary figures.
- r revised figures.
- . not reportable.
- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- less than three firms reporting.
- N.A. replaced by .. figures not available.
- x figures deleted to ensure anonymity.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- P preliminary figures.
- r revised figures.
- . not reportable.
- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- less than three firms reporting.
- N.A. replaced by .. figures not available.
- x figures deleted to ensure anonymity.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

P preliminary figures.

r revised figures.

. not reportable.

.. figures not available.

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

--- less than three firms reporting.

N.A. replaced by .. figures not available.

x figures deleted to ensure anonymity.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- P preliminary figures.
- r revised figures.
 - . not reportable.
 - .. figures not available.
 - ... figures not appropriate or not applicable.
 - nil or zero.
 - amount too small to be expressed.
 - less than three firms reporting.
- N.A. replaced by .. figures not available.
- x figures deleted to ensure anonymity.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

TABLE 1. Shipments of Prepared Stock and Poultry Feeds

| | Total estimated shipments 1966 | October | | Ten months ended October | | |
|---|---|---------|---------|-----------------------------|-----------|--|

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

P preliminary figures.

r revised figures.

. not reportable.

.. figures not available.

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

--- less than three firms reporting.

N.A. replaced by .. figures not available.

x confidential to meet secrecy requirements of
the Statistics Act.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

TABLE 1. Shipments of Prepared Stock and Poultry Feeds

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

P preliminary figures.

r revised figures.

. not reportable.

.. figures not available.

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

--- less than three firms reporting.

N.A. replaced by .. figures not available.

x confidential to meet secrecy requirements of
the Statistics Act.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

The information presented in this report is arranged as follows:

Table 1. Shipments of Prepared Stock and Poultry Feeds

The data in this table provides a summary of the data shown separately in Tables 2, 3, 4, and 5, as reported by the respondents.

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provides the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represents the total finished feed equivalent available from the volume of premixes and concentrated feeds reported by manufacturers in Table 2. The estimate of potential feeds has been supplied by reporting establishments and eliminates the use of factors as previously employed by the Bureau. The resulting estimate should prove more useful since reported data will readily reflect the change in industry activity.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

With the exception of scratch grain feeds and chopped ground or crushed grain feeds, all commodities are tabulated as reported by manufacturers. Shipments of scratch grain feed and chopped ground or crushed grain feeds are collected from a sample group of manufacturers and these have been extended to represent total coverage.

Table 6. Production, Shipments, Inventories and Imports of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see page 31 of the January report for the list of contributors).

Imports are compiled by the External Trade Division from custom invoices and are the latest available.

-- amount too small to be expressed.

--- less than three firms reporting.

N.A. replaced by .. figures not available.

x confidential to meet the requirements of the Statistics Act.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see January report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

p preliminary figures.

r revised figures.

. not reportable.

.. figures not available.

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

--- less than three firms reporting.

N.A. replaced by .. figures not available.

x confidential to meet secrecy requirements of the Statistics Act.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see January report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or Concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.

Statistics Act.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see January report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.

Statistics Act.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see January report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see January report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see January report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.

TABLE 1. Production, Shipments and Inventories of Dehydrated Alfalfa, Clover and Grass Meals

| | Production | | Shipments(1) | | End of month inventory | |
|----------------------------------|------------|--------|--------------|--------|------------------------|--------|
| | 1967 | 1968 | 1967 | 1968 | 1967 | 1968 |

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see January report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.

of the Statistics Act.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see January report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.

TABLE 1. Production, Shipments and Inventories of Dehydrated Alfalfa, Clover and Grass Meals

of the Statistics Act.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see January report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.

TABLE 1. Production, Shipments and Inventories of Dehydrated Alfalfa, Clover and Grass Meals

of the Statistics Act.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see January report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.

TABLE 1. Production, Shipments and Inventories of Dehydrated Alfalfa, Clover and Grass Meals

of the Statistics Act.

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see January report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.

TABLE 1. Production, Shipments and Inventories of Dehydrated Alfalfa, Clover and Grass Meals

SHIPMENTS OF PREPARED STOCK AND POULTRY FEEDS

Summary data, formerly presented in table 1, now appears in the total columns of tables, 2, 3, 4 and 5. For comparison purposes, the previous years' data for both the month under review and cumulative year to date are presented in tables 2, 3, 4 and 5. Sequential monthly data previously published has been discontinued.

The information presented in this report is arranged as follows:

Table 1. Production, Shipments, Inventories of Dehydrated Alfalfa, Clover and Grass Meals

The production and shipments recorded in this table are compiled from information received from operators of Dehydrated Alfalfa Meal plants in Canada, (see December report for the list of contributors).

Table 2. Shipments of Concentrates and Premixes for Feeds

The data in this table provide the reported monthly shipments of concentrates and premixes. They include both the quantity moving direct to the farm level as well as that going to the secondary or franchise operators (if any) for manufacturing complete feeds.

Table 3. Estimated Feed Potential from Premixes and Concentrated Feeds

The data in this table represent the Potential volume of complete feeds that could be produced from the premixes and concentrates reported by the manufacturers in Table 2. The estimates herein presented are prepared by the respective respondents in this survey.

Table 4. Shipments of Secondary or Complete Feeds

The detail of feeds in this section represent the total secondary or finished feeds manufactured from raw ingredients (as opposed to those which use premixes or concentrates). This data is also reported directly by manufacturers of such products and is provided geographically by destination. The total volume of complete or finished feed is provided in Table 1, Section "B". However, provincial volumes may also be determined by the addition of volumes available in Table 3 and 4.

Table 5. Shipments of Other Animal Feeds

Shows only that volume of animal and pet feeds produced by feed registrants within this survey and would not be representative of the total national output of these commodities.
